*Fluidtechnik in Kraftfahrzeugen* Norbert Gebhardt 2010-04-27 Die steigenden Anforderungen an Sicherheits- und Komfortsysteme, aber auch eine Verbesserung der Energieeffizienz haben zu einer starken Erweiterung fluidtechnischer Anwendungen in Fahrzeugen geführt. Das Buch gibt erstmals einen geschlossenen Überblick über die verwendeten Systeme wie u. a. hydraulische oder pneumatische Bremssysteme, hydraulische Lenkunterstützungen, hydrodynamische Wandler, Klimaanlage, Hydraulikzylinder, -pumpen und -motoren. Der Band richtet sich an Studenten wie auch an Techniker und Ingenieure in der Industrie.  
**Hydraulik** Dieter Will 2006-11-15 Schnelle Einarbeitung für Leser: Die Autoren behandeln physikalische/technische Grundlagen und gehen auf die Probleme der Druckflüssigkeit als Energieübertragungsmedium ein. Besonderen Wert legen sie auf die Vermittlung von Kenntnissen zur Vorausbestimmung des Betriebsverhaltens hydraulischer Anlagen, um dynamische Probleme zu vermeiden. Scenarios and Indicators for Sustainable Development—Towards A Critical Assessment of Achievements and Challenges Joachim H. Spangenberg 2019-03-14 Globalization and telecoupling are enhancing the complexity of the coupled socio-ecological system constituted by the interaction between the global ecosphere and the anthroposphere. As a result, the demand for tools to identify transformative innovations, assess future risks, and support precautionary decisions for sustainability is growing by the day in business and politics. Scenarios are a means of simplification, reducing the real-world complexity to a limited number of essential factors to analyze their interactions and support policy formulation, with indicators as communication and monitoring tools. In particular, in a time of “fake news” and “alternative truths” a critical reflection amongst producers and users of scenarios and indicators is overdue—the capability for critical self-reflection is what distinguishes science from pseudo-science, and is a condition of trust. The authors of this book test established measurement and modeling approaches against new challenges, assess the weaknesses of prevailing innovation theories and the political-ideological embedment of archetypical scenarios, highlight deficits in taking the physical basics into account, and the need to understand global interaction and the stepwise process of energy transitions, point out technical as well as conceptual weaknesses in data collection, harmonization and indicator generation, always with a view to solving problems.

**beyond forgetting** Thomas Kampe 2021-01-13 This book explores the intersection between Performance Practices, Critical & Expanded Design, and Memorial Culture,

exploring cross-disciplinary working modes and educational models in response to contemporary and historical persecution and exile. It aims to contribute to the field of Experimental and Expanded Design by probing embodied practices as socially pertinent process-oriented modalities of problem-solving and education. The collection of essays and student projects in this publication gives an insight into the possibility of responding to hidden and reluctant histories of persecution and exile through visual, performative, conceptual and interactive means.

**Advances in Databases and Information Systems** Leonid Kalinichenko 2003-10-02 This volume contains 29 submitted and 2 invited papers presented at the tenth East-European Conference on Advances in Databases and Information Systems (ADVIS 2003), which took place in Dresden, Germany, September 3–6, 2003. An international program committee of 42 members from 24 countries selected these contributions from 86 submissions. Eight additional contributions were selected as short papers and have been published in a separate volume of local proceedings by the organizing institution. For the first time, ADVIS also included an industrial program consisting of nine submitted presentations by representatives of commercial companies active in the database market. ADVIS 2003 was the tenth scienti?c

event taking place under the acronym ADBIS, and thus marks a first "jubilee" for this young, but by now well-established, series of conferences.

ADBIS was founded by the Moscow ACM SIGMOD Chapter in 1993.

In 1994–1996 ADBIS was held in the form of workshops organized by the MOSCOW ACM SIGMOD Chapter in collaboration with the

Russian Foundation for Basic Research.

In this period, a number of international guests were invited to Moscow every year in order to improve and consolidate contacts between the national research community in Russia and the research community worldwide.

International program committees for ADBIS were established in 1995, contributing to the quality of the selection process and thus of the conference contributions in general. In 1996, following discussions with Dr.

*Chemical Vapor Transport Reactions* Michael Binnewies  
2012-08-31 This comprehensive handbook covers the  
diverse aspects of chemical vapor transport reactions  
from basic research to important practical applications.

The book begins with an overview of models for chemical  
vapor transport reactions and then proceeds to treat the  
specific chemical transport reactions for the elements,  
halides, oxides, sulfides, selenides, tellurides,  
pnictides, among others. Aspects of transport from  
intermetallic phases, the stability of gas particles,  
thermodynamic data, modeling software and laboratory  
techniques are also covered. Selected experiments using  
chemical vapor transport reactions round out the work,  
making this book a useful reference for researchers and  
instructors in solid state and inorganic chemistry.

*Kürschners Handbuch der bildenden Künstler* Andreas Klimt  
2005 Kürschners Handbuch der Bildenden Künstler (Kü  
rschner's Almanac of Visual Artists) covers visual  
artists from Germany, Austria and Switzerland in ca.  
5,000 lexically structured articles and provides an up-  
to-date overview of contemporary art in this region. For  
the most part the entries are based on what the artists  
report about themselves. Besides important biographical  
information and details on the works of living artists,  
the handbook informs about the public and private  
galleries, museums and collections with works of modern  
art. A corresponding connection between artists and art  
dealership is thus established. Further helpful indexes  
list associations and societies of artists as well as  
art journals.

**Digital Product and Process Development Systems** George  
L. Kovacs 2013-10-07 This book constitutes the refereed  
proceedings of the IFIP TC 5 International Conference on  
Digital Product and Process Development Systems, NEW  
PROLAMAT 2013, held in Dresden, Germany, in October

2013. The conference succeeds the International Conference on Programming Languages for Machine Tools, PROLAMAT 2006, held in Shanghai, China in 2006. In order to demonstrate the new orientation toward IT innovations, the acronym PROLAMAT has been changed into NEW PROLAMAT and is now interpreted as Project Research on Leading-Edge Applications and Methods for Applied Technology. The 42 revised papers were carefully reviewed and selected for inclusion in the volume. They have been organized in the following topical sections: digital product and process development; additive manufacturing; quality management; standardization and knowledge management developments; and simulation of procedures and processes.

**Ecological Informatics** Friedrich Recknagel 2013-06-29 Ecological Informatics is defined as the design and application of computational techniques for ecological analysis, synthesis, forecasting and management. The book provides an introduction to the scope, concepts and techniques of this newly emerging discipline. It illustrates numerous applications of Ecological Informatics for stream systems, river systems, freshwater lakes and marine systems as well as image recognition at micro and macro scale. Case studies focus on applications of artificial neural networks, genetic

algorithms, fuzzy logic and adaptive agents to current ecological management issues such as toxic algal blooms, eutrophication, habitat degradation, conservation of biodiversity and sustainable fishery.
