Breaking the Cycle Nancy Brown Diggs 2013-10-09 Breaking the Cycle tells the inspiring story of young people whom many would write off as a lost cause but who, thanks to a remarkable school, are headed for success. We learn about their world from teens like Shawna, the daughter of a crack-addicted mother. Or Andre, the only one in his family not on drugs. Or Daron, kicked out of his home by an abusive father. Challenged by the pernicious factors of their environment—drugs, violence, fatherless homes, and poor educational backgrounds—students at the Dayton Early College Academy are nevertheless beating the odds. All are headed for college, from which the vast majority will graduate. The book reveals how this school is succeeding when so many fail. It conveys the hopeful message that others can replicate much of what “DECA” does and save a generation mired in despair. America’s failure to educate its urban children is evidenced by our woeful statistics. If it is possible to turn around this bleak picture—and it is—this is a story well worth telling. And this is what Breaking the Cycle aims to do. For more information on the book, including interviews with the author please check out www.nancybdiggs.com.

Crucible of Science John H. Exton 2013-03-15 "Crucible of Science" is the story of a unique laboratory at Washington University in St. Louis, and of Carl and Gerty Cori, the biochemists who established it. Carl and Gerty met and married at medical school in Prague in the 1920s. After graduation, they immigrated to the U.S. to escape deteriorating conditions in Europe. Carl soon received an offer from Washington University to become Pharmacology Chair, and the couple settled in St. Louis. Not only did both Coris go on to win the Nobel Prize, the laboratory they established at the University has since produced some of the most outstanding scientists the U.S. has ever seen. Six laboratory scientists also won Nobel Prizes; few, if any, laboratories can claim such an impressive record. The Coris themselves were instrumental in establishing the then new science of Biochemistry in the U.S. They applied chemical approaches to elucidating the transformations of compounds such as glucose in animal tissues and defined the enzyme catalysts that carried out those transformations. Both scientists were extremely rigorous in designing their experiments and interpreting the results, a habit that ensured their findings were above question. This book examines the careers of both Coris and the other eminent scientists who trained in their laboratory. It notes the Coris' acceptance of women, Jews, and scientists from all over the world, unique during this time period. It analyzes those reasons why the laboratory was so successful in attracting the best trainees and producing premier scientists. Intended for scientists, science historians, and anyone interested in the history of science, "Crucible of Science" is a unique presentation of remarkable careers and personalities, examined within the context of the Coris' laboratory.

In the Crucible of Chronic Lyme Disease Kenneth B. Liegner, M.D. 2015-10-08 Following completion of his medical training and a one-year stint as attending physician on Howard Champion's Surgical Critical Care Service and MedStar Unit at Washington Hospital Center in the District of Columbia, Kenneth Liegner, M.D. returned to Westchester County, home of his Alma Mater, New York Medical College, to start a private practice. Unwittingly, he had 'plunked himself down' in the heart of a burgeoning epidemic of Lyme disease. His patients confronted him with puzzling syndromes that defied 'tidy' formulations of the illness and thrust him in to a Maelstrom of medical controversy. Lyme disease, a new poorly understood disease, emerged hand in hand with the rise 'managed care'. Physicians caring for persons with Lyme disease, loyal to the Hippocratic Oath and serving what they saw as patients' best medical interests, found themselves on a collision course with a new Corporate Medical Ethic dedicated to maximizing profit. One practitioner's work over 25 years is presented here along with correspondence with many principals in the field. Documentational in nature and not written as a narrative, the materials, nonetheless, convey the intensity of the struggle to characterize the nature of Lyme disease and the desperate fight for proper diagnosis and treatment upon the outcome of which patients' very lives depended. The volume includes protocols useful as reference materials for patients and practitioners alike, as well as photographic images of many persons important in the history of Lyme disease. Foreword by Pam Weintraub, Senior Editor of *aeon* digital magazine and author of award-winning book *Cure Unknown: Inside the Lyme Epidemic*. Preface by Paul W. Ewald,

Professor of Evolutionary Biology at the University of Louisville and author of *Plague Time*.

God Is Plural Paul Veliyathil 2010-01-28 If the God who spoke to Moses on Mount Sinai 3000 years ago, does not speak to Mr. Mosley in Miami Beach in 2009, we have a theological problem. This book is the result of a deep conviction that to be effective in the 21st century, a preacher must focus one eye on the Bible and the other on the mass media. This collection of 52 sermons invites the reader to awaken to a new level of consciousness about his innate identity as a spiritual being and to affirm the divinity in others. The author beautifully blends his personal stories with the stories of God and challenges you to look beyond what you see, to experience God with your sixth sense, treat every place as holy ground and to love your neighbor as an extension of your own self. Thought provoking and non traditional, these sermons are relevant beyond the walls of churches and chapels

Atonement Ian McEwan 2009-03-19 From the Booker Prize winning author of *Amsterdam*, a brilliant new novel. On the hottest day of the summer of 1935, thirteen-year-old Briony Tallis sees her sister Cecilia strip off her clothes and plunge into the fountain in the garden of their country house. Watching her is Robbie Turner, son of the Tallis's cleaning lady, whose education has been subsidized by Cecilia's and Briony's father, and who, like Cecilia, has recently come down from Cambridge. By day's end, their lives will be changed - irrevocably. Robbie and Cecilia will have crossed a boundary they had not imagined at its start. And Briony will have witnessed mysteries, seen an unspeakable word, and committed a crime for which she will spend the rest of her life trying to atone... Brilliant and utterly enthralling in its depiction of love and war and class and childhood and England, *An Atonement* is a profound - and profoundly moving - exploration of shame and forgiveness, of atonement and of the possibility of absolution.

[and] will also appeal to Marines of the 'Old Corps' since it shows we still 'make 'em like we used to.'"—Leo J.
