Faith Peter James 2010-10-07 How perfect is too perfect? Ross Ransome is at the top of his profession; one of the

most successful, and certainly one of the richest, plastic surgeons in the business. Such a man would expect his wife to be perfect - and why not? After all, he has spent enough hours in surgery to get her that way. But when his wife falls ill she turns her back on conventional medicine, and her arid marriage, and seeks help from the world of alternative medicine and a charismatic therapist who promises not just medical salvation. For Ransome, this is the ultimate betrayal. It defies logic, and Ross Ransome is a profoundly logical man. Logically, he can see no reason why any man should have his wife when he can't. It's all completely rational... 'Irresistibly readable as well as utterly believable' Robert Goddard 'Britain's closest equivalent to Stephen King.' The Judge Lied Yinka Bamgbelu 2014-09-18 The Judge Lied: True Story "Someone must be trusted, let it be the judges." -Lord Denning "Transparent, equality, and EXACT laws." - President Thomas Jefferson In recent years, there has been a rising crescendo of complaint over the legitimacy - sometimes even the honesty - of particular judicial conduct. From political conservatives come charges that judges are overriding the will of the people as expressed in statute and referenda relating to abortions, gay rights, affirmative action, religion, and other subjects. From political liberals come charges of bias against women, sexual misconduct, harshness towards the interest of minorities, and forced imposition of deeply conservative political views. From both sides come charges of overriding the people's views and protecting the professional politicians by striking down term limits. From all venues, even high-priced corporate lawyers, comes tyrannical and arbitrary conduct by trial judges. Misuse of position and even bribery are known to have sometimes existed. Beyond these matters, one dean of a law school's thirty-four years as a law professor and litigator persuaded him that there is yet another problem, one that is widespread. It is that judges too often are unwilling to listen to facts or reasons. They start with predilections heavily favouring one side; predilections, which they, of course, deny, and then prove impervious to facts and resulting reasons contrary to their bias. When judges act on the basis of their prior predilection, ignore facts, and even make up supposed counter facts, they destroy a central tenet of the judicial system: the decision of cases based upon facts rather than prejudice. They also destroy faith in the judicial system.

Cathy returns to her hometown seeking healing after a broken relationship, but discovers that among her friends and acquaintances is someone who wants her out of town...or dead. Lawyer Will Kennedy, her high school sweetheart, offers help, but does it carry a price tag? Is hospital chief of staff, Dr. Marcus Bell, really on her side in her fight to get hospital privileges?
