The Last Lecture Randy Pausch 2008-04-08 "We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

**Mickey Mouse History and Other Essays on American Memory** Michael Wallace 1996 This is a book about why history matters. It shows how popularized historical images and narratives deeply influence Americans' understanding of their collective past. A leading public historian, Mike Wallace observes that we are a people who think of ourselves as having shed the past but also avid tourists who are on a "heritage binge," flocking by the thousands to Ellis Island, Colonial Williamsburg, or the Vietnam Memorial. Wallace probes into the trivialization of history that pervades American culture as well as the struggles over public memory that provoke stormy controversy. The recent imbroglio surrounding the National Air and Space Museum's proposed Enola Gay exhibit was reported as centering on why the U.S. government decided to use the A-Bomb against Japan. Wallace scrutinizes the actual plans for the exhibit and investigates the ways in which the controversy drew in historians, veterans, the media, and the general public. Whether his subject is multimillion dollar theme parks owned by powerful corporations, urban museums, or television docudramas, Mike Wallace shows how their depictions of history are shaped by assumptions about which pasts are worth saving, whose stories are worth telling, what gets left out, and who is authorized to make the decisions. Author note: Mike Wallace is Professor of History at John Jay College, City University of New York. He is the co-author, with Edwin G. Burrows, of *Gotham: A History of New York City to 1898*, winner of the 1999 Pulitzer Prize for History.

**Hungry Hearts** Walsh, Jennifer Rudolph 2022-02-01 Sixteen innovators, creatives, and thought leaders—Austin Channing Brown, Sue Monk Kidd, and Luvvie Ajayi Jones, among others—share intimate stories of uncovering beauty and potential through moments of fear, loss, heartbreak, and uncertainty. “You’ll find kindred spirits in these tales of resilience, transformation, and joy.”—Time Over the course of four years, the traveling love rally called Together Live brought together diverse storytellers for epic evenings of laughter, music, and hard-won wisdom to huge audiences across the country. Well-known womxn (and the

occasional man) from all walks of life shared their most vulnerable truths in a radical act of love, paving the way for healing in the face of adversity. Now, off the stage and on the pages of *Hungry Hearts*, sixteen of these beloved speakers offer moving, inspiring, deeply personal essays as a reminder that we can heal from grief and that divisions can be repaired. Bozoma Saint John opens herself up to love after loss; Cameron Esposito confronts the limits of self-reliance in the wake of divorce; Ashley C. Ford learns to trust herself for the first time. **Apartheid's Festival** Leslie Witz 2003-10-06 *Apartheid's Festival* highlights the conflicts and debates that surrounded the 1952 celebration of the 300th anniversary of the landing of Jan Van Riebeeck and the founding of Cape Town, South Africa. Taking place at the height of the apartheid era, the festival was viewed by many as an opportunity for the government to promote its nationalist, separatist agenda in grand fashion. Leslie Witz's fine-grained examination of newspapers, brochures, pamphlets, and advertising materials reveals the expectations of the festival planners as well as how the festival was engineered, historical figures were reconstructed, and the ANC and other anti-apartheid organizations mounted opposition to it. While laying open the darker motives of the apartheid regime, Witz shows that the production of local history is part of a global process forged by the struggle between colonialism and resistance. Readers interested in South Africa, representations of nationalism, and the making of public history will find *Apartheid's Festival* to be an important study of a society in transition.

**Twentysomething Essays by Twentysomething Writers** Matt Kellogg 2006-08-29 Selected as the winners of Random House's national contest, a stunning collection of essays ranging from comic to poignant, personal to political, by the brightest young writers you haven't heard of . . . yet. Here, for the first time, current twentysomethings come together on their own terms, in their own words, and begin to define this remarkably diverse and self-aware generation. Tackling an array of subjects—career, family, sex, religion, technology, art—they form a vibrant, unified community while simultaneously proving that there is no typical twentysomething experience. In this collection, a young father works the late-night shift at Wendy's, learning the finer points of status, teamwork, and french fries. An artist's nude model explains why she's happy to be viewed as an object. An international relief worker wrestles with his choices as he starts to resent the very people who need his help the most. A devout follower of

Joan Didion explains what New York means to her. And a young army engineer spends his time in Kuwait futilely trying to grow a mustache like his dad's. *The Psychosocial Implications of Disney Movies* Lauren Dundes 2019-07-11 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical

perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

*Manufacturing Desire* Arthur Asa Berger 2017-07-12 The average person in America watches four hours of television per day and spends the equivalent of nine years of his or her life in front of the television set. If the attention most people devote to popular culture - listening to the news, watching soap operas, reading the comics-were added up, it would reveal that most people spend an enormous amount of time with popular culture which becomes in large measure, their culture. "Manufacturing Desire" is a study of how the mass media broadcast or spread various popular arts; further how the media and popular arts play a major role in shaping our everyday lives. The television shows we watch, the movies we see, the radio programs we listen to, and all the comic strips we read influence social behavior. They give us ideas about what is good and evil, about how to solve problems, and about how we should relate to others. If we understand this, says Berger, then the way we think about our media-influenced culture will be far different than if we see popular culture as mindless entertainment. Berger provides an analysis of the way popular culture and the mass media simultaneously reflect and affect various aspects of American culture and society. He examines commercials, television shows, comics, film, humor, and everyday life in terms of what beliefs and values are found in them, what attitudes toward ourselves, and our societies are contained in them, how they achieve their effects, and what they reflect about present-day American culture and society. This book is analysis of the impact mass media have across America, cross-culturally, and internationally. "Manufacturing Desire" will provide the general reader as well as specialists in communication and information, sociology, and psychology with a better understanding of the effects of mass media and popular culture on contemporary society.

*From Virgin Land to Disney World* 2001-01-01 With the publication in English in 1930 of *Civilization and its Discontents* and its thesis that instinct - and, ultimately: nature - had been and must be forever subordinated in order that civilization might thrive and endure, Freud contributed what some contemporaries saw to the central debate of his era -- a debate which had long preoccupied both official American pundits and the American populace at large. At the beginning of the new Millennium, evidence abounds that an American debate still rages over the meaning of "nature," the rightful weight of instinct, and the status of civilization. The Millennium itself has appeared in popular and official discourses as an appropriate marker of an age in which nature is close to the edge of radical extinction and has also become more and more unreliable as a

paradigm for representation and debate. At the same time, the contemporary tailoring of nature to postmodern needs and expectations inevitably reveals the conceptual difficulty of any possible, simple opposition between nature and culture as if they were clearly distinguishable domains. If nature, then, can clearly be seen as a discursive concept, it may also be a timeless concept insofar that it has been shaped, created, and used at all times. Every epoch, age and era had "its own nature," with myth, history and ideology as its dominant shaping forces. From the Frontier to Cyberia, nature has been suffering the "agony of the real," resurfacing in discursive strategies and demonstrating a powerful impact on American society, culture and self-definition. The essays in this collection "speak critically of the natural" and examine the American debate in the many guises it has assumed over the last century within the context of major critical approaches, psychoanalytical concepts, and postmodern theorizing.

**Markets without Limits** Jason F. Brennan 2015-08-20 May you sell your vote? May you sell your kidney? May gay men pay surrogates to bear them children? May spouses pay each other to watch the kids, do the dishes, or have sex? Should we allow the rich to genetically engineer gifted, beautiful children? Should we allow betting markets on terrorist attacks and natural disasters? Most people shudder at the thought. To put some goods and services for sale offends human dignity. If everything is commodified, then nothing is sacred. The market corrodes our character. Or so most people say. In *Markets without Limits*, Jason Brennan and Peter Jaworski give markets a fair hearing. The market does not introduce wrongness where there was not any previously. Thus, the authors claim, the question of what rightfully may be bought and sold has a simple answer: if you may do it for free, you may do it for money. Contrary to the conservative consensus, they claim there are no inherent limits to what can be bought and sold, but only restrictions on how we buy and sell.

**Walt Disney and the Quest for Community** Steve Mannheim 2016-02-24 During the final months of his life, Walt Disney was consumed with the world-wide problems of cities. His development concept at the time of his death on December 15th, 1966 would be his team's conceptual response to the ills of the inner cities and the sprawl of the megalopolis: the Experimental Prototype Community of Tomorrow or, as it became known, EPCOT. This beautifully written, instantly engrossing volume focuses on the original concept of EPCOT, which was conceived by Disney as an experimental community of about 20,000 people on the Disney World property in central Florida. With its radial plan, 50-acre town center enclosed by a dome, themed international shopping area, greenbelt, high-density apartments, satellite communities, monorail and underground roads, the original EPCOT plan is reminiscent of post-war Stockholm and the British New Towns, as well as today's transit-oriented development theory. Unfortunately, Disney himself did not live long enough to witness the realization of his model city. However, EPCOT's evolution into projects such as the EPCOT Center and the town of Celebration displays a remarkable commitment by the Disney organization to the original EPCOT philosophy, one which continues to have relevance in the fields of planning and development.
