*Optical Architectures for Augmented-, Virtual-, and Mixed-reality Headsets* Bernard C. Kress 2020 "This book is a timely review of the various optical architectures, display technologies, and building blocks for modern consumer, enterprise, and defense head-mounted displays for various applications, including smart glasses, smart eyewear, and virtual-reality, augmented-reality, and mixed-reality headsets. Special attention is paid to the facets of the human perception system and the need for a human-centric optical design process that allows for the most comfortable headset that does not compromise the user's experience. Major challenges--from wearability and visual comfort to sensory and display immersion--must be overcome to meet market analyst expectations, and the book reviews the most appropriate optical technologies to address such challenges, as well as the latest product implementations"--

**Communication, Control, and Computer Access for Disabled and Elderly Individuals** Dale Bengston 1987 One of a series of three resource guides concerned with communication, control, and computer access for the disabled or the elderly, the book focuses on hardware and software. The guide's 13 chapters each cover products with the same primary function. Cross reference indexes allow access to listings of products by function, input/output feature, and computer model. Switches are listed separately by input/output features. Typically provided for each product are usually an illustration, the product name, vendor, size, weight, power source, connector type, cost, and a description. Part I, "Computer Adaptations," presents the following types of items: modifications for standard keyboards; alternate inputs usable with all software; input devices usable with only some software; input adapters for

computers; alternate display systems usable with all software; Braille printers and tactile display components; speech synthesizers; and other software and hardware adaptations. Part II, "Application Software for Special Ed and Rehab," includes software for administration and management; assessment; education, training, and therapy; recreation; and personal tools or aids. Appendixes include a list of additional sources of information, a glossary, addresses of manufacturers listed with their products, and an alphabetical listing of all products in the 3-book series. **The Typewriter Revolution: A Typist's Companion for the 21st Century** Richard Polt 2015-11-12 The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The Typewriter Revolution documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from type-ins to typewritten blogs, from custom-painted typewriters to typewriter tattoos. It celebrates the unique quality of everything typewriter, fully-illustrated with vintage photographs, postcards, manuals, and more.

**Using and programming the Epson HX-20 portable computer** E. Balkan 2012-12-06 Why this book? Other than the fact that I like writing about computers more than just about anything else, this book fills several real needs. No matter how many manuals a computer manufacturer puts out to accompany a syste- and some of Epson America's are very good - not everything can be covered. This book fills in the gaps. This book is unbiased, having been written independently of Epson. So, I won't be telling you to drop everything and run out to buy an HX-20. The HX- 20 is good for some uses, not so good for some others. This book is a guide to out of the machine and/or pointing you towards a different getting the most machine that might better suit your needs. At the start of this project I had to decide who was my target audience: novices, experts, or those in between? Because HX-20 owners and prospective owners don't fall into neat categories, I tried to 'cover all the bases'. Or at least as many as possible. As with any attempt to do everything, I didn't always succeed. But I did succeed in providing at least something for everyone. For those who haven't yet bought a portable - or are unsure if buying an HX-20 was the right move - there are descriptions of 20 other portables on the market. For those who have used other computers before, there's information on how Epson BASIC differs from other BASICs, with tips on converting programs.
