It teaches counseling graduate students how to become solid group leaders (or—to be more precise—how to begin their journey in that direction), and it does this in a way that is positive, knowledgeable, and realistic...The most impressive aspect of the material is the authors’ focus on the experiential approach (training students to be group leaders), combined with an accessible writing style, a lot of knowledge, and an enthusiastic attitude.” —Marilyn MacGregor, Western New Mexico University “It’s clear that the authors have a wealth of experience with counseling groups—information is conversationally presented and realistically discussed.” —Marla J. Muxen, South Dakota State University “This book is very readable and clearly explains the points it makes using accessible examples which students can readily understand. *Negotiating a Presence-Centred Christian Counselling* Simon Shui-Man Kwan 2016-04-26 How Christian is Christian counselling? In what ways should one's counselling practice be conducted in order to fulfil one's role as a Christian counsellor? Is there a counselling practice that truly penetrates into the secular approaches while remaining faithful to the Christian traditions of healing? What are the theological roots of secular counselling? How may secular counselling both reinforce and challenge the Christian faith? In answering these questions, this book engages readers to navigate between two frames of reference: one Eastern, secular, social scientific, and modern; the other Western, Christian, theological, and traditional. At levels of both theory and practice, this book undertakes to integrate, synthesize, hybridize, revise, dichotomize and antagonize the two. It proposes a revised presence-centred counselling approach which may serve as a perspective that helps us to see things in more depth as we shuttle back and forth between the two frames. This book thus negotiates a revised presence-centred form of counselling that is theologically grounded, social scientifically informed, and cross-culturally sensitive. As the author's counselling practice proceeds mainly in societies where Chinese is the majority, the cross-cultural examinations and proposals offered in this book have been bred in a space where Chinese culture meets the Christian (Protestantism in particular) West. This book is an outgrowth of the author's experience teaching Christian counselling courses for 17 years and his 30-year clinical practice experience in places where East meets West, namely Hong Kong and South China (Guangdong Province).

**Assessing Family Relationships** Theresa A. Beeton 2019-05-28 Assessing Family Relationships shows mental health professionals how to utilize the Family Life Space Drawing (the FLSD), a family assessment tool that incorporates information from multiple family members while building connections between the clinician and the client. In this manual, Theresa A. Beeton and Ronald A. Clark demonstrate the usefulness of the FLSD in both family and couple counseling. As a task-centered assessment tool, the FLSD enables an interactive and personalized process of counseling, which helps individuals to express concerns and information about themselves in an indirect and nonthreatening manner. Chapters are illustrated throughout with case studies and drawings adapted from the authors' own clinical experience, and the manual offers an overview of the history of the FLSD, as well as where future research is headed. Providing a practical explanation of how to complete the FLSD process, Assessing Family Relationships will be highly relevant to couple and family therapists, as well as clinical social workers, who are interested in updating their practice with innovative family assessment research and techniques.

**Couples in Treatment** Gerald R. Weeks 2014-01-10 This third edition of Couples in Treatment helps readers conceptualize and treat couples from multiple perspectives and with a multitude of techniques. The authors do not advocate any single approach to couple therapy and instead present basic principles and techniques with wide-ranging applicability and the power to invite change, making this the most useful text on integrative, systemic couple therapy. Throughout the book the authors consider the individual, interactional, and intergenerational systems of any case. Gerald Weeks' Intersystems Model, a comprehensive, integrative, and contextual meta framework, can be superimposed over existing therapy approaches. It emphasizes principles of therapy and can facilitate assessing, conceptualizing couples' problems, and providing helpful interventions. Couple therapists are encouraged to utilize the principles in this book to enhance their therapeutic process and fit their approach to the client, rather than forcing the client to fit their theory.
