Includes an on/off switch on the back cover to extend battery life. Touch, feel, and hear the dinosaurs in this interactive, sturdy board book that features appealing photo-real illustrations of dinosaurs, tactile textures, and exciting sounds. Press the touch-and-feels to hear five exciting sounds, with a button on the last page to play all five sounds again!

Dinosaurs David E. Fastovsky 2021-07-01 The ideal textbook for non-science majors, this lively and engaging introduction encourages students to ask questions, assess data critically and think like a scientist. Building on the success of previous editions, Dinosaurs has been thoroughly updated to include new discoveries in the field, such as the toothed bird specimens found in China and recent discoveries of dinosaur soft anatomy. Illustrations by leading paleontological illustrator John Sibbick and new, carefully-chosen photographs, clearly show how dinosaurs looked, lived and their role in Earth history. Making science accessible and relevant through clear explanations and extensive illustrations, the text guides students through the dinosaur groups, emphasizing scientific concepts rather than presenting endless facts. Grounded in the common language of modern evolutionary biology – phylogenetic systematics – students learn to think about dinosaurs the way that professional paleontologists do.

DINO BONE Rose Siva 2021-04-20 'What sort of dinosaur had a bone like that?' wondered Josh.... Kat cajoles Josh into going with her to a remote settlers hut in a regional farming area to investigate a stash of what could be dinosaur bones collected over a lifetime by a recently deceased cattle drover. The bones were only discovered after his death, and Kat has been asked by a palaeontologist friend to check out the collection. Camping in a remote area, they strike up an unusual friendship with a local stockman who, with his local knowledge, leads them to safety when they get caught up in an emergency and have to flee for their lives. And is it only dinosaur bones they find?

Never Touch the Dinosaurs Make Believe Ideas Ltd 2019-09-03 A dinosaur-themed silicone touch-and-feel counting book.

Dinosaurs in the Supermarket Timothy Knapman 2015-08-06 A trip to the supermarket turns into havoc when dinosaurs go wild in the aisles! As Stegosaurus spills beans and Diplodocus gobbles up greens, can a little boy get the big beasts to behave?

Never Touch a Dinosaur! Make Believe Ideas Ltd 2020-09 A tactile touch-and-feel book all about dinosaurs.

A Cultural-Historical Study of Children Learning Science Marilyn Fleeer 2014-10-01 This book moves beyond the traditional constructivist and social-constructivist view of learning and development in science. It draws upon cultural-historical theory in order to theorise early childhood science education in relation to our currently globalised education contexts. The book argues that concept development in science for young children can be better theorised by using Vygotsky's concept of Imagination and creativity, Vygotsky's theory of play, and his work on higher mental functions, particularly the concept of inter and intrapsychological functioning. Key concepts are extracted from the theoretical section of the book and used as categories for analysis in presenting evidence and new ideas in the second section of the book. In this second part of the book, the authors examine how science knowledge has been constructed within particular countries around the globe, where empirical research in early childhood science education has occurred. The third part of the book examines the nature of the encounter between the teacher and the child during science learning and teaching. In the final part of the book the authors look closely at the range of models and approaches to the teaching of early childhood science that have been made available to early childhood teachers to guide their planning and teaching. They conclude the book with a theoretical discussion of the cultural-historical foundation for early childhood science education, followed by a model of teaching scientific concepts to young children in play-based settings, including homes and community contexts.

Oh My Oh My Oh Dinosaurs! Sandra Boynton 1993-10-01 Sunbathing dinosaurs and artistic dinosaurs, dancing dinosaurs and volleyball-playing dinosaurs make learning opposites fun! Here.Come.the.Dinosaurs.Pat-a.Cake.2017-04-06 Some dinosaurs are out and about, doing clever things.

Dinosaurs DK 2020-06-16 This nonfiction chapter book is chock-full of bite-size dino facts, black-and-white photographs, and CGI illustrations to dazzle and engage even the most reluctant reader. The prehistoric world is vast, but Microbites: Dinosaurs breaks it all down into manageable chunks of information on need-to-know topics like dino diet, species identification, fossilization, and life after dinosaurs. Illustrations and photographs accent nearly every page, while highlighted text calls out important takeaways about each chapter topic, revealing new details about the amazing creatures that once roamed Earth. For further learning, kids can turn to the book's eight-page reference section, where they'll find a glossary, a paleontological timeline, and even a dino family tree. Whether they're new to the prehistoric world or seasoned pros, readers will find plenty of fascinating facts to chew on in Microbites: Dinosaurs. DK's Microbites series takes daunting nonfiction topics and transforms them into easy-to-digest, mini-guides on kids' favorite subjects from history, science, and the natural world. Packed with eye-catching illustrations, detailed photgraphs, and the latest scientific research on everything from dinosaurs to mummies, the Microbites series encourages a healthy reading appetite in kids ages 8 through 12, and will leave them hungry to learn more.

Here Comes the Sun Steve Jones 2019-06-06 Our sun drives the weather, forms the landscape, feeds and fuels - but sometimes destroys - the creatures that live upon it, controls their patterns of activity, makes chemicals in the skin that cheer up those who bask in its rays, and for the ancients was the seat of divine authority. In Here Comes the Sun, Steve Jones shows how life on Earth is ruled by our nearest star. It is filled with unexpected connections; between the need to stay cool and man's ability to stand upright, between the power of memory and the onset of darkness, between the flow of solar energy through the plants and animals and of wealth through society, and between Joseph Goebbel's 1938 scheme to make Edinburgh the summer capital of a defeated Britain and the widening gap in the life expectancy of Scottish men compared to that of other European men brought on by thnat nation's cloudy climate. Its author charts some of his own research in places hot and cold across the globe on the genetic and evolutionary effects of sunlight on snails, fruit-flies and people and shows how what was once no more an eccentric specialism has grown to become a subject of wide scientific, social and political significance. Stunningly evocative, beautifully written and packed full of insight, Here Comes the Sun is Steve Jones's most personal book to date.

Baby Touch and Feel 2018-05 With touch and feel patches and sparkly areas to explore, this baby dinosaur board book encourages early learning, and is just right for sharing with your little one. Inside, on 12 sturdy pages, you meet engaging baby dinosaurs hatching, hiding, playing, and sleeping, from long-necked Diplodocus with leathery skin, to baby T. rex with twinkly teeth, and bumpy, plated baby Stegosaurus. The delightful baby dinosaurs are unique, full of character, entertaining, and immediately appealing, and every page of Baby Touch and Feel Baby Dinosaurhas tantalizing texture or an eye-catching shiny area to expand a baby's senses. Easy for very young children to follow, there's one main picture per page to focus on that's clear and life-like, which help a young child's identification skills. The short, fun text is great for reading aloud and building language. All the dinosaurs are also labelled, with helpful pronunciation guides for their names. This small padded book is perfect for little hands to hold. Babies and toddlers will love turning the tough board pages themselves, which develops their fine motor skills. Part of DK's popular Baby Touch and Feelseries, this exciting preschool dinosaur book with its super sparkly jacket makes an ideal baby gift. Age Range- 0-5 years

My Very First Dinosaurs Book Alex Frith 2016-02-01 This highly visual non-fiction book for very young children is packed with dinosaurs to look and talk about. Little children can find out about different species of dinosaur, how big they were, what they ate and how they lived and died.

Dinosaurs on Other Planets Danielle McLaughlin 2016-08-09 For fans of Alice Munro, Anne Enright, and William Trevor comes a stunning debut collection from a deeply original writer and observer of love, betrayal, and turning points in ordinary peoples' lives. In a raw seacoast cabin, a young woman watches her boyfriend go out with his brother, late one night, on a mysterious job she realizes she isn't supposed to know about. A man gets a call at work from his sister-in-law, saying that his wife and his daughter never made it to nursery school that day. A mother learns that her teenage daughter has told a teacher about problems in her parents' marriage that were meant to be private—problems the mother herself tries to ignore. McLaughlin conveys these characters so vividly that readers will feel they are experiencing real life. Often the stories turn on a single, fantastic moment of clarity—after which nothing can be the same. Danielle McLaughlin is a writer of unparalleled precision and uncommon imagination. In her deft hands, ordinary people are transformed and surprising truths are suddenly understood. Praise for Dinosaurs on Other Planets “Dinosaurs [on Other Planets] marks the stateside debut (in book form, at least—a number of these already have appeared in *The New Yorker*) of Danielle McLaughlin, a writer of exceptionally deep empathy in the naturalistic tradition of John McGahern and Claire Keegan but with a knack for keen, and often disturbing, observation all her own.”—LitHub “McLaughlin’s immersive first collection casts a stern eye on individuals, couples, and families caught in nets of their own making, where even the mildest passion can lead to death, and journeys home with new lovers can reveal grim secret lives. . . . The title story, which opens up into an ambiguous ending rather than tying its strands up neatly, show[s] the ample bag of tricks McLaughlin has at her disposal.”—Publishers Weekly “Danielle McLaughlin’s short story collection *Dinosaurs on Other Planets* is a near perfect, enormously promising debut. . . . McLaughlin’s subject matter and themes are serious, undercut brilliantly by a sly strain of pitch-black humor. . . . A brilliant, quietly disturbing debut story collection [that] portrays Irish characters in the uncertain wake of the recent financial crisis.”—Shelf Awareness “In her collection, [McLaughlin] focuses on fraught relationships and those sudden, illuminating moments that can light up ordinary lives.”—Library Journal “This is not a debut in the usual sense, a promise of greater things to come. There is no need to ask what Danielle McLaughlin will do next—she has done it already. This book has arrived. I think it will stay with us for a long time.”—Anne Enright, Man Booker Prize-winning author of *The Green Road* “Danielle McLaughlin’s stories seethe, beneath elegant prose, with unfamiliar insights and entirely original observations. Only an author who loves what human beings are can so compassionately reveal them in all their flawed, gorgeous contradictions and communicate unmistakable joy while doing so. How glad I am to read this impressive new writer! Her fiction is a gift we need.”—Robin Black, author of *Life Drawing*

Clap Hands: Here Come the Cars Pat-a-Cake 2021-06-10 Clap hands and play with this range of exciting toddler touch-and-feel books! Dinosaurs Campbell Books 2019-03-21 Take a trip to meet the Dinosaurs! Lift the giant flaps to reveal the dinosaurs and touch lots of exciting textures. Feel the bumpy head of Triceratops, the smooth skin of Diplodocus and the scratchy plates of Stegosaurus. Bright and friendly illustrations from Tiago Americo bring the prehistoric scenes to life and, with something to spot or count on every page too, each colourful book in the My First Touch and Find series provides lots of fun for older babies and toddlers. Also available in this tactile series: Jungle, Park, Farm, Zoo, Sea, London.

My Visit to the Dinosaurs Alike 1985-10-02 Dinosaurs are extinct now, but you can visit dinosaur skeletons in a museum. There you will meet Brachiosaurus, Stegosaurus, and Diplodocus and learn how they ruled the earth millions of years ago. You'll see dinosaurs with over 1,000 teeth, dinosaurs who could swim, meat-eaters and plant-eaters. And, of course, you'll meet the king of all dinosaurs, the gigantic Tyrannosaurus rex.

Hello, World! Dinosaurs Jill McDonald 2018-02-13 Learn from home and explore the world with these fun and easy board books! All young children love dinosaurs. Here's a Hello, World! board book that teaches toddlers all about Triceratops, Stegosaurus, T-rex, and many more—with colors, shapes, sizes, and super-simple facts. Hello, World! is a series designed to introduce first nonfiction concepts to babies and toddlers. Told in clear and easy terms (“T. rex’s arms were very small, even though its body was large”) and featuring bright, cheerful illustrations, Hello, World! makes learning fun for young children. And each sturdy page offers helpful prompts for engaging with your child. It’s a perfect way to bring science and nature into the busy world of a toddler, where learning never stops. Look for all the books in the Hello, World! series: •Solar System •Weather •Backyard Bugs •Birds •Dinosaurs •My Body •How Do Apples Grow? •Ocean Life •Moon Landing •Pets •Arctic Animals •Construction Site •Rainforest Animals •Planet Earth •Reptiles •Cars and Trucks •Music •Baby Animals •On the Farm

Encyclopedias of Dinosaurs & Prehistoric Life Kitty Blount 2008 Provides in-depth entries on early Earth's climates, conditions, animal and plant life forms that flourished and flourished throughout each era, along with biographies of notable figures.

What the Dinosaurs Did Last Night Refe Tuma 2015-10-20 From the creative parents who brought the world the web sensation "Dinovember" comes photographic proof of what toys get up to when the rest of the house is asleep. You might have noticed weird things happening in your house. Unexplainable messes. Food all over the kitchen floor. Who could the culprits be? Dinosaurs! Boasting bright and hilarious photographs, along with a story written from the point of view of an older, wiser sibling, Refe and Susan Tuma's picture book documents a very messy adventure that shows just what the dinosaurs did last night.
