Domestic Violence Jerry L. Johnson 2005 Each title in the Allyn & Bacon Johnson & Grant Casebook Series presents three to four in-depth cases in a different topic area, prefaced by an introduction to generalist social work practice. Allyn & Bacon Casebook Series for Domestic Violence, First Edition by Jerry Johnson and George Grant provides students with personal and intimate glimpses into the thinking and actions of experienced practitioners working with clients coping with domestic violence. The contributors to this casebook combined many decades of social work experience and teaching to create a one-of-a-kind tool for students to study and analyze how practitioners think about practice. The authors move beyond the belief that practice involves finding "correct" interventions to solve client problems, and instead invite students to review and challenge the work of others to help them understand what compromises important practice decision with real clients in real practice settings.

It Ends with Us Colleen Hoover 2020-07-28 In this "brave and heartbreaking novel that digs its claws into you and doesn't let go, long after you've finished it" (Anna Todd, New York Times bestselling author) from the #1 New York Times bestselling author of *All Your Perfects*, a workaholic with a too-good-to-be-true romance can't stop thinking about her first love. Lily hasn't always had it easy, but that's never stopped her from working hard for the life she wants. She's come a long way from the small town where she grew up—she graduated from college, moved to Boston, and started her own business. And when she feels a spark with a gorgeous neurosurgeon named Ryle Kincaid, everything in Lily's life seems too good to be true. Ryle is assertive, stubborn, maybe even a little arrogant. He's also sensitive, brilliant, and has a total soft spot for Lily. And the way he looks in scrubs certainly doesn't hurt. Lily can't get him out of her head. But Ryle's complete aversion to relationships is disturbing. Even as Lily finds herself becoming the exception to his "no dating" rule, she can't help but wonder what made him that way in the first place. As questions about her new relationship overwhelm her, so do thoughts of Atlas Corrigan—her first love and a link to the past she left behind. He was her kindred spirit, her protector. When Atlas suddenly reappears, everything Lily has built with Ryle is threatened. An honest, evocative, and tender novel, *It Ends with Us* is "a glorious and touching read, a forever keeper. The kind of book that gets handed down" (USA TODAY).

Co-creator of the dolls, Marcia Morgan, takes readers through an interview from beginning to end. She provides guidelines on how to create an environment intended both to minimize a child's trauma and to enhance the amount, quality and validity of information obtained. She examines problems practitioners might encounter with young children and provides material on pre-interview preparation, training exercises and a listing of audio-visual resources.

Assessing Dangerousness Jacquelyn C. Campbell 1995 Using a firm research and theoretical approach, this volume brings together experts in the fields of health, mental health, and criminal justice to predict future violence. In language accessible to clinicians, *Assessing Dangerousness* discusses the prediction of homicide in spouse abuse, of child abuse using the Child Abuse Potential Inventory, of further violence by sexual offenders, and of further assault by batterers. The contributors, wellknown in their areas of expertise, discuss accurate measurement using tested instruments as well as the role of clinical observations. The introductory chapter presents the theoretical and clinical issues involved in predicting violence in general, and the final chapter summarizes the major points and presents the health and judicial implications of the findings. "Learning how to predict violence is an important skill. This book is the equivalent of a university course on the subject." --Ron MacIssac, review in *What's Happening*, Victoria, B.C. "This text addresses one of the most difficult issues in the assessment and treatment of violent individuals--assessing their degree of dangerousness and risk of recidivism. Assessing Dangerousness takes the reader through an educated discussion of the different models for assessing dangerousness that have appeared since the 1950s and 1960s up until the present and, most significantly, presents up-to-date approaches to tackling such assessment areas as physical and sexual abuse, sexual assault, and wife assault. Drawing on the research and clinical expertise of prominent individuals, the text accomplishes its task of describing the importance and the limitations to assessing risk of dangerousness. The volume should appeal to professionals in law, criminal justice, psychology, social work, psychiatry, and many related disciplines." --David A. Wolfe, University of Western Ontario "Highly recommended." --Family Violence & Sexual Assault Bulletin Book Club

All About Love bell hooks 2018-01-30 A New York Times bestseller and enduring classic, *All About Love* is the acclaimed first volume in feminist icon bell hooks' "Love Song to the Nation" trilogy. *All About Love* reveals what causes a polarized society, and how to heal the divisions that cause suffering. Here is the truth about love, and inspiration to help us instill caring, compassion, and strength in our homes, schools, and workplaces. "The word 'love' is most often defined as a noun, yet we would all love better if we used it as a verb," writes bell hooks as she comes out fighting and on fire in *All About Love*. Here, at her most provocative and intensely personal, renowned scholar, cultural critic and feminist bell hooks offers a proactive new ethic for a society bereft with lovelessness--not the lack of romance, but the lack of care, compassion, and unity. People are divided, she declares, by society's failure to provide a model for learning to love. As bell hooks uses her incisive mind to explore the question "What is love?" her answers strike at both the mind and heart. Razing the cultural paradigm that the ideal love is infused with sex and desire, she provides a new path to love that is sacred, redemptive, and healing for individuals and for a nation. The Utne Reader declared bell hooks one of the "100 Visionaries Who Can Change Your Life." *All About Love* is a powerful, timely affirmation of just how profoundly her revelations can change hearts and minds for the better.

New Directions in Child Abuse and Neglect Research National Research Council 2014-03-25 Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

Groupwork with Children of Battered Women Einat Peled 1995 With the belief that intervention should be available to all members of families experiencing domestic violence, the authors of this book provide practitioners with the necessary knowledge base to operate successfully a group programme for children of battered women. The programme, aimed at children aged from four to 12 years, provides a framework for healing and education. Peled and Davis guide readers through an initial child assessment, with sample intake forms provided in an appendix. They then describe both group sessions for the children that take place over a 10-week period and concurrently run parenting skills groups. The authors go on to detail a family session which marks the conclusion of the programme.

The Body Keeps the Score Bessel van der Kolk, M.D. 2014-09-25 #1 New York Times bestseller "Essential reading for anyone interested in understanding and treating traumatic stress and the scope of its impact on society." --Alexander McFarlane, Director of the Centre for Traumatic Stress Studies A pioneering researcher transforms our understanding of trauma and offers a bold new paradigm for healing in this New York Times bestseller *Trauma* is a fact of life. Veterans and their families deal with the painful aftermath of combat; one in five Americans has been molested; one in four grew up with alcoholics; one in three couples have engaged in physical violence. Dr. Bessel van der Kolk, one of the world's foremost experts on trauma, has spent over three decades working with survivors. In *The Body Keeps the Score*, he uses recent scientific advances to show how trauma literally reshapes both body and brain, compromising sufferers' capacities for pleasure, engagement, self-control, and trust. He explores innovative treatments--from neurofeedback and meditation to sports, drama, and yoga--that offer new paths to recovery by activating the brain's natural neuroplasticity. Based on Dr. van der Kolk's own research and that of other leading specialists, *The Body Keeps the Score* exposes the tremendous power of our relationships both to hurt and to heal--and offers new hope for reclaiming lives.

Switch Chip Heath 2010-02-16 Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind--that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

Toxic Love Indira Haracic-Novic 2021-02-10 Are you a victim of domestic abuse? Or do you aspire to stop abusing your intimate partner? Do you simply want to understand what motivates an abuser to reoffend? If so, this ground-breaking book is for you. With their innovative approach, clinical psychologist Indira Haracic-Novic and men's health expert Dean Quirke shed new light on the epidemic of domestic violence against women. Instead of viewing spousal or intimate partner abuse as the sole result of power and control tactics, the authors invite readers to explore the repetitive patterns of abusive behaviour - which tend to escalate in frequency and severity - within a behavioural addiction paradigm. They have consolidated their expertise in this book, assisting victims to heal from the trauma of abuse, and to prevent it from happening in future relationships. Reaching out to men who want to stop abusing their loved ones, Haracic-Novic and Quirke also provide strategies to break free from their repetitive patterns of abusive behaviour. By dismantling the dangerous aspects of the personality that may have become addicted to abusing their partners, victims and abusers become free to create healthier loving relationships.
